

Institut Universitaire de Technologie de Chalon-sur-Saône

Burgundy – FRANCE

IUT de Chalon-sur-Saône

The University Institute of Technology – Institut Universitaire de Technologie (IUT) – is a branch of the **Université de Bourgogne Franche Comté**.

The campus is located in **Chalon sur Saône** (Burgundy) in modern and spacious facilities. It is an ideal setting for our 450 students.

The institute also offers excellent career prospects with an employment rate exceeding 90 %.

Chalon is an important industrial and logistic hub. Our undergraduate courses are designed to meet the requirements of businesses and we provide state of the art tools and resources.

Campus life

Practising sport

Sport practise is deeply rooted on the campus, with our dedicated sports teacher (SUAPS) : Indoor/outdoor climbing, badminton, team sports, ...

Themed sports weeks (skiing, climbing) in France or abroad are organized on a regular basis. Along with special students events.

The IUT offers a range of purpose-built student accommodation.

Courses

We do our utmost to help students with individual tutoring as well as study aids when necessary. We also have an increasing number of international students from China, Vietnam and various countries in Africa.

The IUT has 31 full-time certified teachers with 15 teacher-researchers and more than 100 visiting professional lecturers from all fields!

Two large technological workshop platforms, a research lab are available to all students on the campus, along with the various chemistry, physics and language labs. The IUT has recently innovated in terms of teaching methods, opening its own ModuLab, a large room with mobile furniture and screens for students to work in autonomy.

The course programme comprises various traineeship periods in companies – in France or abroad – to allow our students to get first hand experience. Our students also have the possibility to register in a very successful sandwich-programme, spending half of their training time in companies for hands-on experience.

Students complete their degree in three years.

Discover our offer
